WL Research Community - user contributed research based on documents published by WikiLeaks.  
(<https://our.wikileaks.org>)

Tor is an encrypted anonymising network that makes it harder to intercept internet communications, or see where communications are coming from or going to.  
(<https://www.torproject.org/>)

Tails is a live operating system, that you can start on almost any computer from a DVD, USB stick, or SD card. It aims at preserving your privacy and anonymity.  
(<https://tails.boum.org/>)

The Courage Foundation is an international organisation that supports those who risk life or liberty to make significant contributions to the historical record.  
(<https://www.couragefound.org/>)

Bitcoin uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of bitcoins is carried out collectively by the network.  
(<https://www.bitcoin.org/>)
