## Our Exploit Acquisition Program

---

**ZERODIUM**

**ZERODIUM pays premium bounties and rewards to security researchers** to acquire their original and previously unreported zero-day research affecting major operating systems, software, and devices. While the majority of existing bug bounty programs accept almost any kind of vulnerabilities and PoCs but pay very low rewards, **at ZERODIUM we focus on high-risk vulnerabilities with fully functional exploits**, and we pay the highest rewards on the market.

## Eligible Research

ZERODIUM is currently acquiring zero-day exploits affecting the following products:

### **Operating Systems**

Remote code execution or local privilege escalation:

- Microsoft Windows 10 / 8.1
- Apple macOS 10.x
- Linux (CentOS, Ubuntu, Tails)
- VM Escape (VMware WS / ESXi)

### **Web Browsers**

Remote code execution, or sandbox bypass/escape (if any), or both:

- Google Chrome
- Microsoft Edge
- Mozilla Firefox / Tor
- Apple Safari

### **Clients / Readers**

Remote code execution, or sandbox bypass/escape (if any), or both:

- MS Office (Outlook/Word/Excel)
- Mozilla Thunderbird
- PDF Readers (Adobe / Foxit)
- Adobe Flash Player

### **Mobiles / Phones**

Remote code execution, or privilege escalation, or other vulnerabilities:

- Apple iOS 11.x/10.x
- Android 8.x/7.x/6.x
- BlackBerry 10
- Windows 10 Mobile

### **Web Servers & Related**

Remote code execution or sensitive information disclosure:

- Apache HTTP Server
- Microsoft IIS 10/8.x/7.x
- nginx web server
- OpenSSL / mod\_ssl / PHP

**Email Servers & Related**

Remote code execution or sensitive information disclosure:

- MS Exchange
- Dovecot
- Postfix
- Sendmail

**Web Applications**

Remote PHP code execution or SQL injection, or information disclosure:

- WordPress / Joomla / Drupal
- phpBB / vBulletin / MyBB
- IPS Suite / IP.Board
- Roundcube / Horde

**Others / Techniques**

Any other innovative research or techniques related to:

- Smartphone Security
- Mitigations Bypass
- Tor De-anonymization
- AntiVirus RCE/LPE

**☑ Eligible Mobile Brands**

Apple, Google, Samsung, LG, Huawei, Sony, HTC, Xiaomi, Acer, Asus, Vivo, Motorola, Lenovo, OPPO, BlackBerry, Vertu, ZTE, BBK, and Gionee.

NOTE: If you have zero-day exploits affecting other products or systems not listed above, feel free to [submit](#) (submit.html) minimal details and we'll be glad to discuss the opportunity.

## ZERODIUM Payouts

ZERODIUM payouts for eligible zero-day exploits range from \$5,000 to \$1,500,000 per submission. The amounts paid by ZERODIUM to researchers to acquire their original zero-day exploits depend on the popularity and security strength of the affected software/system, as well as the quality of the submitted exploit (full or partial chain, supported versions/systems/architectures, reliability, bypassed exploit mitigations, default vs. non-default component, process continuation, etc). For more information, please read our [FAQ](#) (faq.html).

The payout ranges listed below are provided for information only and are intended for fully functional/reliable exploits meeting ZERODIUM's highest requirements. ZERODIUM may pay higher rewards for exceptional exploits or research.

# ZERODIUM Payouts for Desktops/Servers\*

\* All payouts are subject to change or cancellation without notice, at the discretion of ZERODIUM. All trademarks are the property of their respective owners.

# ZERODIUM Payouts for Mobiles\*

\* All payouts are subject to change or cancellation without notice, at the discretion of ZERODIUM. All trademarks are the property of their respective owners. 2017/08 © zerodium.com

## Submission Process
